- Python
- C Programming
- Basics of Java
- HTML
- CSS
- DBMS
- SQL
- Problem Solving
- Decision Making

EDUCATION

SSLC
The Presidency Public School
Percentage - 84.48%
2017 - 2018

PRE UNIVERSITY COLLEGE
Sheshadripuram pre university
college
Percentage - 67%
2018-2020

BACHELOR OF ENGINEERING
Channabasaveshwara Institute of
technology
CGPA -6.95
2020-2024

INTERNSHIP

EUNOIA LABS, Banglore
Domain - Machine Learning
**Credit Card fraud detection using
machine learning**

PROFILE

An enthusiastic Computer Science and Engineering
student from Channabasaveshwara Institute of
Technology completed my four years of engineering
passionate about developing my skills as a
coder , participated in Hackathon which helped my
coding views and created a zeal to enhance my
learning. Given an opportunity to work, I would better
grab my skills and knowledge to fullest and give my
best.

PERSONAL PROJECTS

1.Bank Management System

Built a web app for Bank Management System using php and
MySQL as backend and HTML,CSS and JavaScript for frontend.

2.My Wallpaper

Built a mobile app using HTML,CSS and JavaScript as frontend and
Java as backend.

3.Flowing Fountain

This project runs using Visual Studio,OpenGL software,
C language.

MAJOR PROJECT

1.Underwater plastic detection using deep learning

Developed a model to detect underwater plastic using deep learning

CERTIFICATES

Python beginners - udemy

Introduction to C - sololearn

Participated in Hackathon state level - CIT

Participated in workshop on Git, GitHub, Microsoft Azure -
CIT

Participated in placement preparation organized by
Abhyuday IIT Bombay
